Hangzhou Popu Electric Company

# American Switches & Sockets

www.popu-electric.com

PRODUCT GUIDE 2.0

# Factory Profile

Rooted in Zhejiang Province in eastern China, Popu Electric is at the forefront of OEM/ODM services for American standard switches and sockets. The Company has been uniquely positioned to service our clients across the American switches and sockets countries.

**22+**
years' experience in the business

**$10+ million**
annual revenue

**160+**
employees

## Our Mission

At Popu Electric we believe our customers always deserve better, whether it's product offerings, costs, delivery lead time or the swift response from our account team. Our mission is to support and help our customers to address their day-to-day business challenges. We are committed to constantly driving the efficiency of our operations and supply chain to new levels. And we strive to provide the very best customer service along with the expertise that we have gained from our manufacturing and operations experience in the American standard switches and sockets industry for over 20 years.

## Our History

We are one of the largest manufacturers of American standard switches and sockets in Zhejiang Province in eastern China. Our founder and the management team started their career in this industry in early 2000. Over the years, they had gained extensive experiences in the area of product innovation, production control and quality management. Also thanks to our comprehensive product offerings and high operation efficiency, dozens of renowned customers have been attracted to us. Now Hangzhou Popu Electric has established a stronghold in the industry, with more than 160 employees and two manufacturing sites in Hangzhou and Wenzhou respectively.

## What Can We Offer?

There are so many good reasons to work with Popu Electric and these include :

- Products manufactured to the highest Standards
- Broad range of products to choose from
- Very competitive costs/quotation
- New products development capability.
- Responsive account management team

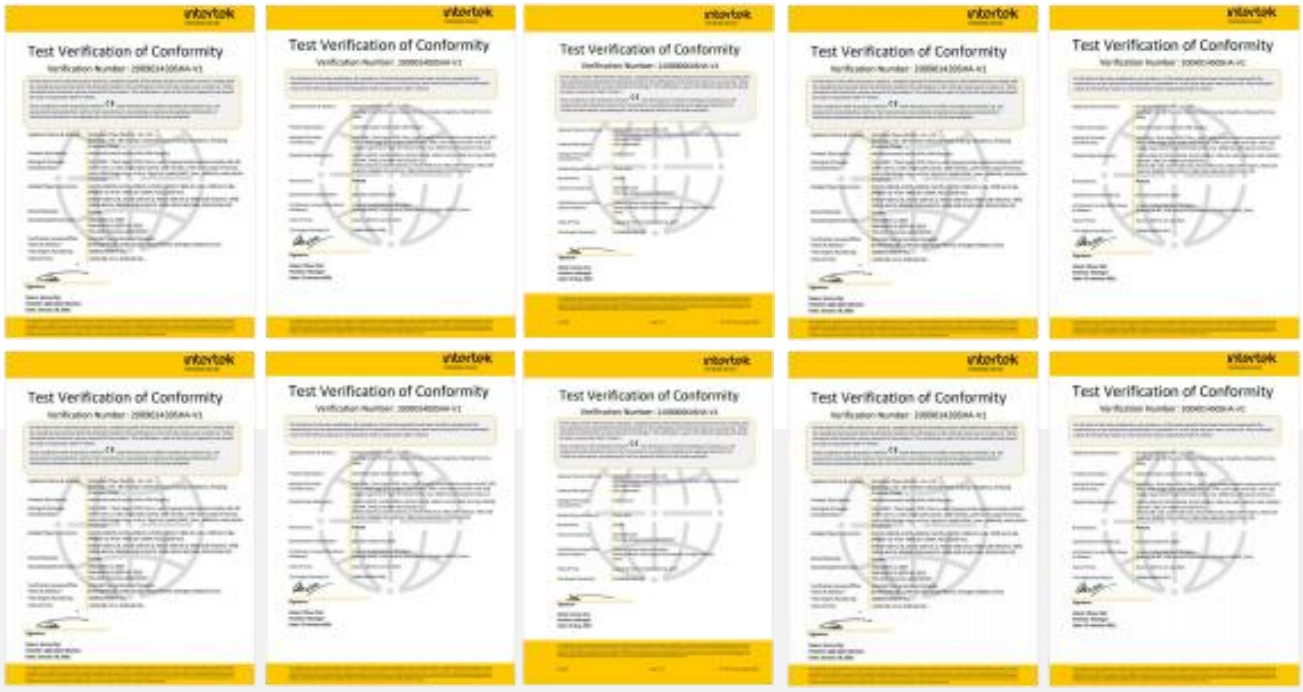
# Factory Tour

## Factory Qualification

Our ISO 9001 quality management system certificate.

## Product Certificates

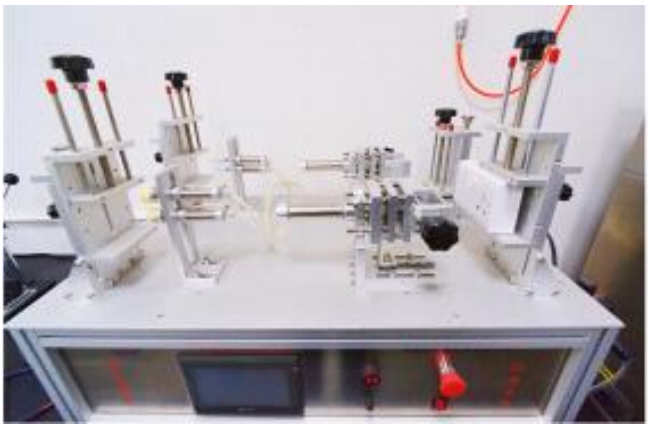


All of our products are tested in compliance with relevant international standards.

## Our Team

As a talented and dedicated team, we are committed to providing superior services to our customers.

## In House Lab



To ensure products are safe and durable, a lot of the tests are conducted in our own labs, including power loads tests, life cycle tests, impact tests, resistance tests, salt spray and hi-low temperature and humidity testing, etc.

## Semi-automatic Assembly Workshop

As an engineering and product expert, our Managing Director developed these automatic machines, which improve the efficiency by at least 30%. The company looks to adopt more of these machines in the near future.

## Finished Products Assembly Workshop

Ten assembly lines are lined up in the shop floor. More than 35,000 pieces of products can be produced within an 8-hour shift.

## Our Warehouse

In each and every week, on average, three 40 feet containers are shipped out of the factory, to our customers around the world.
